

Air/O₂ Blenders: A Blender for every purpose

Ideal model for NICU Application

Key features

Comes with **0-15 lpm** flow meter close mounted to the left-hand side

This makes a perfect spot to attach a resuscitation bag and keeps the footprint as small as possible and minimizes the amount of wall space required position and use as desired

3 Different options configured with the Right-side flow meter depending on the needs and practice of the unit

Right side comes installed with either 1) **0-1 lpm** 2) **0-3.5 lpm** or 3) **1-15 lpm** flowmeter depending on the model you choose, which allows for use with a nasal cannula, CPAP, etc.

Unique feature on the right-side BLEED Control (3 lpm)

The right-side flow meter is installed on an integrated bleed control switch: When the right side is not needed, the bleed flow (3 lpm) can be disabled by pushing and rotating the flow meter forward when needed, simply return it to the upright position and use as desired

Standard input fittings are DISS for Air and Oxygen

But, NIST fittings on the blender is also available.
